REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The examiner searched multiple universal card slots that supported multiple standards. However, all that was found were either systems that had a controller for each supported standard such as in Chou et al US 2005/0059301 and Huang et al 6,718,274 or systems that loaded a driver for the supported standard such as Coutts et al PN 6,311,165 and Hamann et al PN 6,516,357. Of the references that had separate controllers, none of them provided a direct path between the connector and the bus when the card in the connector was the same standard as the bus. Even most PCI dedicated slots found included PCI-to-PCI bridge circuits. There were references such as Nelson PN 5,768,612 found that taught a direct path between the PCI slot and the PCI bus but this had only one supported type of card and did not also teach a translated path. PN 2005/0097253 to Wang et al taught a I/O card that had a direct path and a path to an I/O controller; however, the I/O controller was for the I/O card's use of the memory card and not for translating between the memory card standard and the Host system bus standard.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
